## About WVA

- ❑ WVA is a team of young architects and likeminded people who believe in bringing transition to the society through our architectural vision.
- ❑ We bring client's dream in to reality with help of our architectural expertise. Our expertise lies in treating every design opportunity as a personal endeavour and envisioning a distinctive and an innovative perspective right from the conceptual development to the execution of the project.
- ❑ We play a role as creative catalysts in the urban landscape by moulding and reshaping the context of various metros and growing small cites from micro to macro level. We envision an overall growth of the city and its denizens by carrying out various projects.

## Team

### Ar. Pravin Kudkar- Principal Architect

- ❑ Pravin, is an enthusiastic and highly motivated Architect, evolved from varied work experience during his professional employment.
- ❑ His thrive for design has inspired the establishment of WVA. He studied Architecture (B.Arch.) from Kamla Raheja Vidyanidhi Institute for Architecture and Environmental Studies, Mumbai and is registered under Council of Architecture, India (COA).
- ❑ Having previously worked at India's leading Architect Mr.Hafeez Contractor, had experience on working with a wide range of projects/clients across the nation. Subsequently for professional growth joined Ar. Qutub Mandviwala and got promoted as Associate within one year from the date of joining. Was the youngest Associate in MQA.
- ❑ With the said exposure, we try to maintain same business ethics and deliverables at WVA. We are proud to deliver results that exceed the expectations of our clients.
- ❑ Highlights of the career so far worked with the developers like TATA housing, TransIndia Group, Gami Group, Jaydeep Group, Omar Reality, Kalpataru, DSK, DLF, DB Reality, Ajmera etc.

## Team

- ❑ Ar. Kiran Kolhe- Associate Architect  
More than 18 years of experience in Residential and Commercial buildings.
- ❑ Sujal Dahilkar –Interior Designer  
1 years of experience in Residential and Commercial buildings.
- ❑ Mr. Krishnaji Rawool – Design Coordinator  
More than 20 years of experience in field as a design coordinator and working with me since 2015.
- ❑ Mr. Mangesh Gotad – Design Coordinator  
More than 20 years of experience in field as a design coordinator and working with me since 2020.
- ❑ Mr. Ganesh Pawar– Draughtsman  
More than 22 years of experience in field as a design coordinator and working with me since 2024.
- ❑ Mr. Mayur Mistri – Site Supervisor  
More than 10 years of experience in field as a site coordinator and working with us since 2024.

## Alliances

At WVA we have tie-ups with business partners who help us in getting the various aspect of project done in their respective expertise. As an architect firm, we initiate the architectural work and our association with them helps us in speedy delivery of the work scheduled.

REHAB BUILDING

Office Building at BKC for Transindia Group

The site lies on the banks of Mithi River, and the NE, East and South side having low-rise buildings ensures that the ensemble building guides the line of sight from the island city.

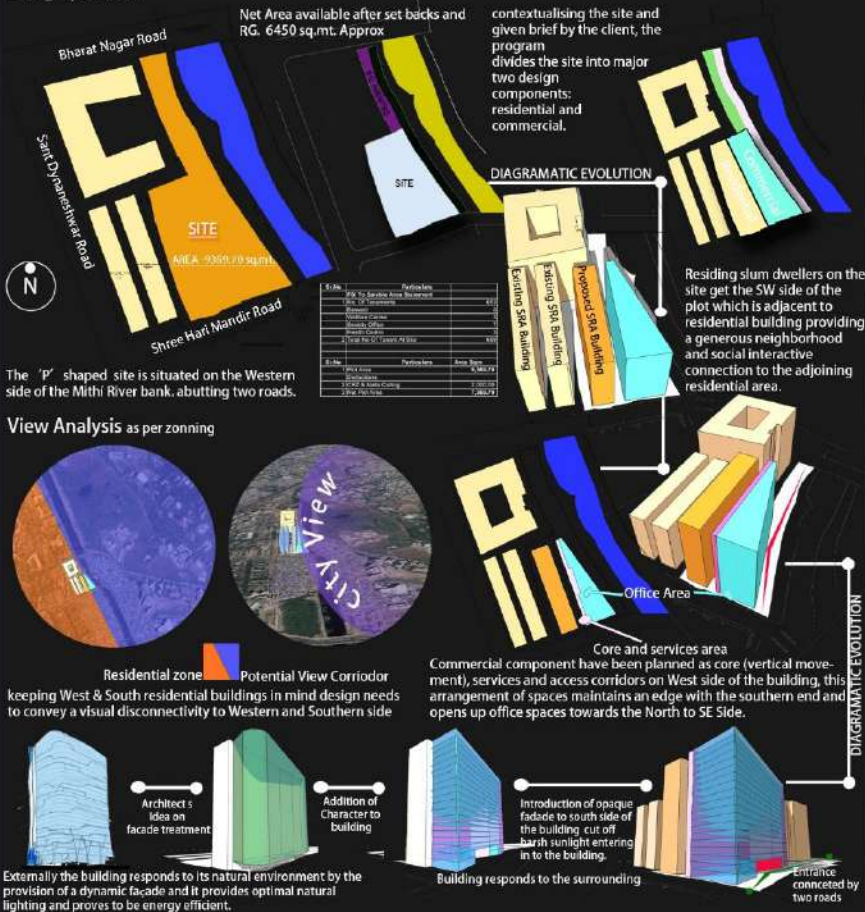

The design aims to establish a business district character in the site, through conscious efforts of blending in the vision of BKC. It provides an icon for the city that empowers with form and volume also changes the surrounding urban landscape.

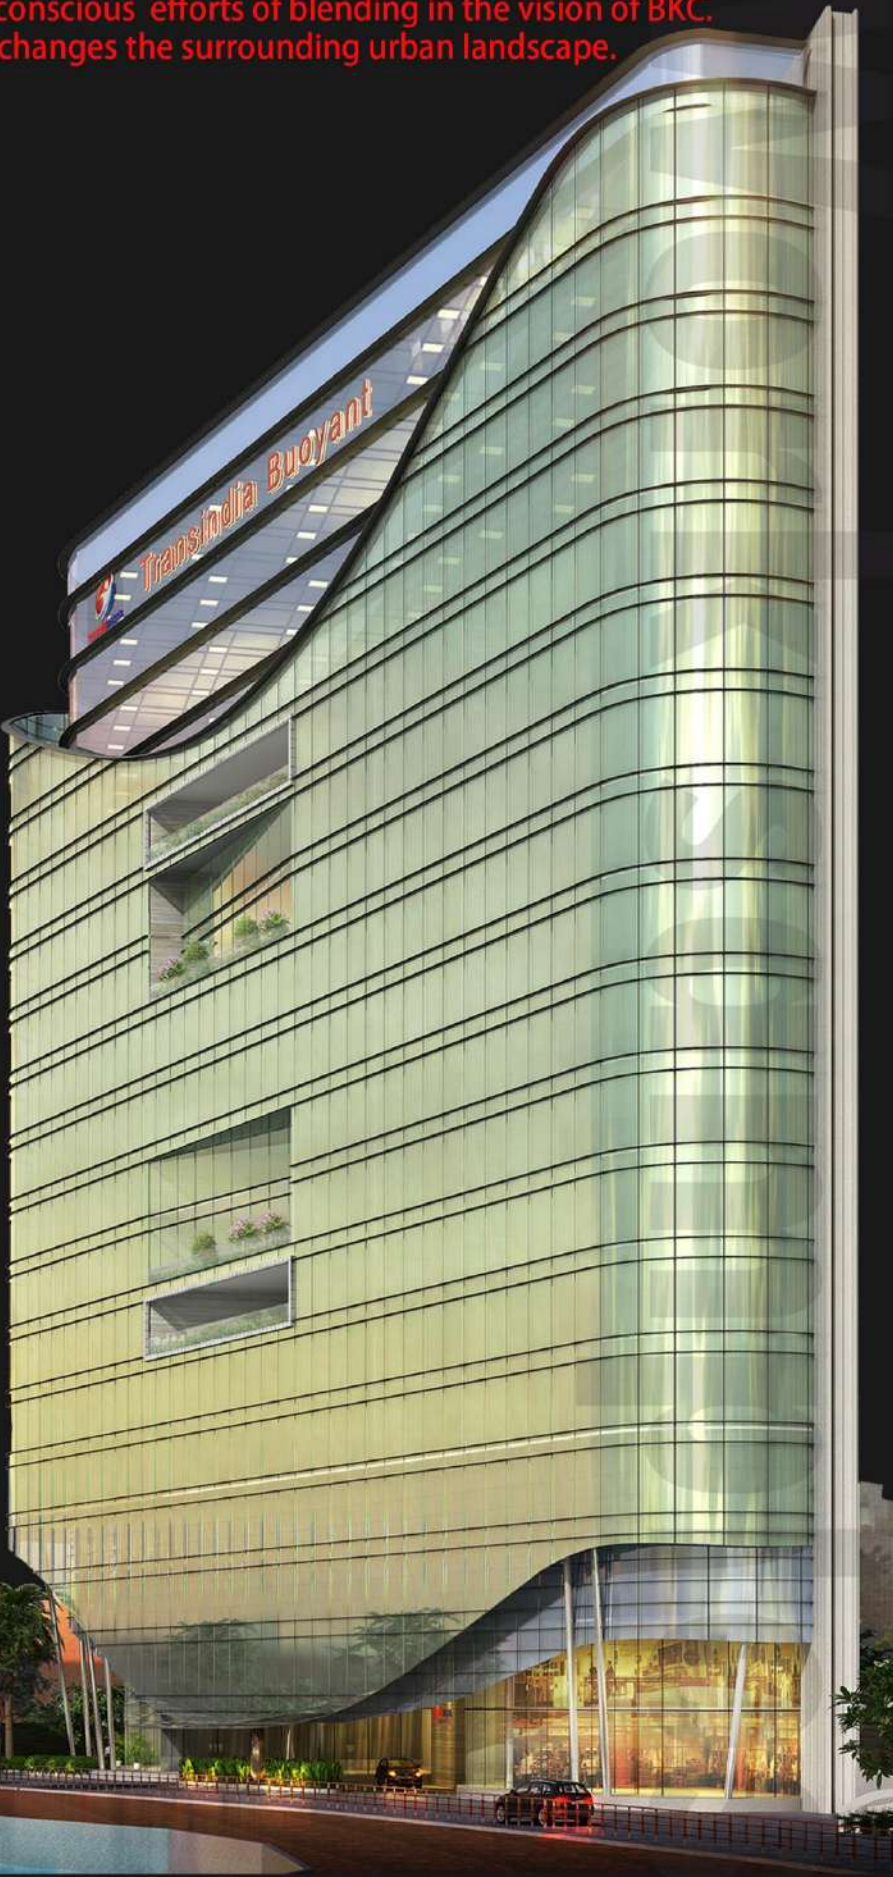

FLOOR PLANS

Design process:

Design/form of the building is inspired by the characteristics of the river and physiognomies of ships. While sailing Sail of a ship get its shape by the wind direction and creates interesting volume in inner side of convex, similarly, the glass facade placed on the Eastern Northern side of the building inspired by the shape of the sail of a ship helps by providing a variety of themed social, professional and digital collaboration spaces at different scales and sizes throughout the building it also offers apt light and the view beyond from North to South Side.

Undulating bottom facade is inspired by the rhythms of waves which helps creating fluidic ambience at the entrance and it also interweaves the social collaborative spaces on the ground.

FLOOR PLAN

# Residential Buildings Free Way 37 at Wadala

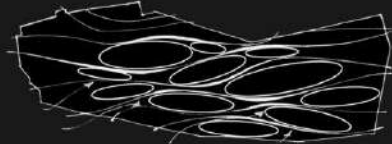

## Site Analysis

Extents of the site marks infra-structurally apt precinct with Rail, Monorail & Road network marking the Sion station, Monorail station & Eastern express highway as focal points to access site.

The water/ green belt streaming down the site, reclaimed land portions & avenue of Coconut trees along the length reminds of coastal characteristics creating the instinctive feeling of belonging to nature & utopia we desire.

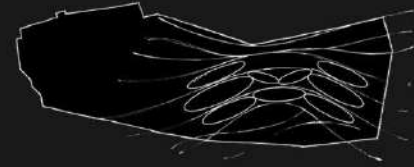

Forces of wind & seasonal water tracing diagonally through the site initiates the Natural process of transforming rigid edges into free flowing yet parametric ellipsoids.

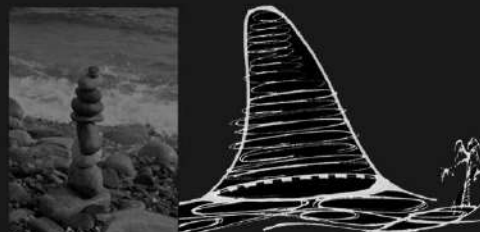

## E(nvision)-CO(relation)

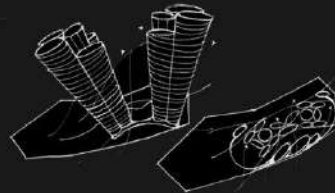

The design concept is inspired by Beach Pebbles\* which evolves as metaphor of Creation in terms of their existence & Connection in terms of harmony they serve to human nature.

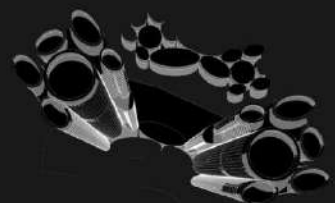

Such formation process of oblate ellipsoids has been systemized to achieve retreatable masses of proportions.

Keeping in mind the pebbles get eroded on sides as they tend to stay on their flat side; Ellipsoids can be stacked to make vertical built forms making it relate to its origin.

Form of the building evolves by merging these masses together having the vista of coconut trees with water bodies formulated to enhance the feel of nature & making it futuristic yet livable space.

The recreational activities on podium between the two building defines the unbound feeling of openness & warmth of visual connection to the building sharing a glimpse of nature every human being reminisces about.

ANCHOR Residency at Ghatkoper (W)

## Orchid corporate park at Andheri for DB Realty

March-2007-2008

### Urban Analysis

#### Location

Given Site is in Sector 136 of Greater Noida, Delhi. As per the NOIDA MASTER PLAN 2031, the plot falls into institutional zone

Site is in a rectangular form with roads adjacent to the shorter side 24m access road is on the South-East facade which connects to the Expressway

On the North-West facade 100m electrical Corridor is there which is no development zone (potential Green area)

Longer Sides of the site shares adjoining plot compound wall

As per Norms ground coverage is only 30% of the plot area

Design Brief demands 8 levels ecological design

### Location / Movement corridors

#### Site Potential

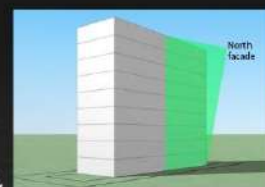

### Envision of Shape and Form

Following Massing Study will Explain the envision of Final form of the iconic structure which is green building reflecting a sustainable, ecological design.

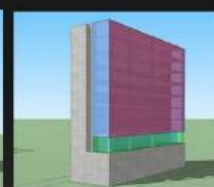

### Concept

#### Design Purpose

The site which is a rectangular block, lies ad near the expressway. Our concept proposes an ICON for the city of Noida which empowers the district with it shape and volume. The J.M. BAXI corporate office, structure would stand alone viewing the express way on the South-West side .

Basic volume required to consume the FAR

Introduction of recreational spaces & glass on northern facade

Playing with Facade treatment and shape of the building

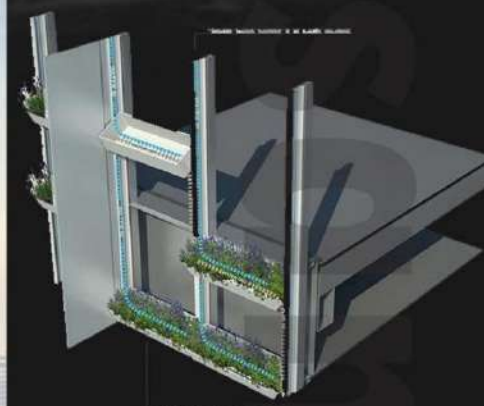

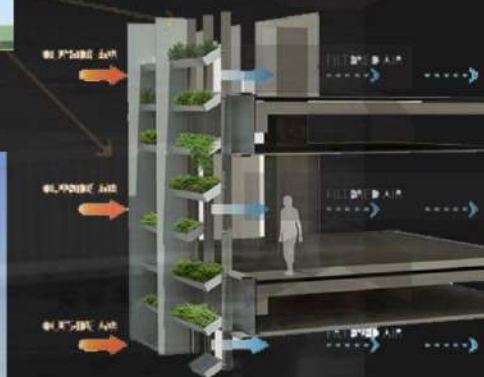

Reshaping the form and reducing glass facade

Accomplishment of iconic form for the building

### Green Planter System As Facade Filter

THE FORM of the structure is derived through a structure of a ship and the internal zoning is done, keeping in mind the desired requirements of the company.

## Concept

In the coastal city of Mumbai, Borivali encompasses itself with gardens at almost every block.

The area holds its pride high as it is the only suburb in Mumbai which has a forest on the east (Sanjay Gandhi National Park) mangrove forests in the west (Gorai), looking at such a site, having a lush green, and at the same time having such a renowned history.

Our concept, to this project has been procured keeping in mind our cities origin and having been blessed with such a rich history of the 7 Islands, and having this lush of green we aspire to create a residential island city.

Borivali is a suburban area located into the north-west section of Mumbai. Sitting on the northern tip of western Mumbai has green space but lacks on sea breeze, the promenade feel and endless sea-view

Mumbai's 7 Island house for communities of fishing colonies had seen drastic change from emperor ruler to foreign ruler to becoming the 4th most populous city in the world.

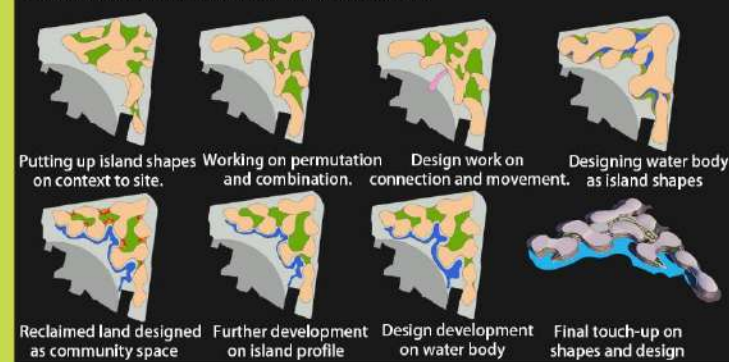

The 7 island has grown to have its own individual identity with sea facade around them which pulls a lots of attraction.

An island city, which has never been experienced before, where every island holds its own identity and gets its shape from the original 7 islands that, formed the archipelago.

However, being tweaked to serve the people.

These 7 islands together form elite podiums, elevating a set of twelve buildings. The intermediate spaces create these voids, which intern act as landscaping residual area, enhancing this "suburb of gardens" to a greater extent.

## Urban Analysis

URBAN  
Establishment of an eco-residential area in the harmony with surroundings.  
Creation of attractive scenery along with residential context.  
Creation of urban setting through harmonizing the existing street and urban context

## Master Plan

## FSI Calculation

## Option 1

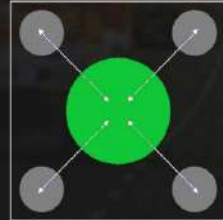

## THE COURTYARD WHICH LIVE:

The hierarchy of open space can attain its maximum potential by providing courtyard acting as private open space which open up to an superior social or community space creating a meeting point for different activities, providing access to them, providing overflow from them, and providing the cross-circulation between them.

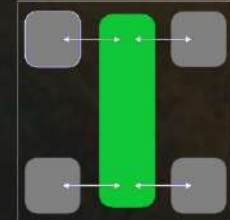

Courtyard ought to placed that it give at least a glimpse of some other space beyond it with no less than 2-3 loops from the building and so that the natural paths which connect these open space pass across the courtyard.

Reference sketch from pattern language

Conceptual Idea on courtyard Design.

Concept Development as per Site requirement.

Our idea represented in Design.

## Option 2

## DESIGN CONCEPT

- Inspired by an Live Tree's plan evolves an landscape oriented planning where the major connection starts from centre of Site and branches out into different direction forming interesting landscape spaces and club houses.
- The idea of Club houses or landscape is an addition inspired by branches which broaden just before branching out into small branch
- Small branches is portrayed as small landscape spaces evolving from branches which becomes the transit spaces connecting small courtyard space to bigger community space.
- Inspired by trees anatomy, learning how water runs on each part of tree, A water body runs between two branches creating a landscape fest with many fascinating spaces.

Studing a Tree plan and selecting few branches for landscape

Extracted and highlight of required branches.

Merging site plan with extracted branch connection.

Allocating club house and interesting landscape spaces as per site potential.

## Option 3

## DESIGN DEVELOPMENT

1) TOPOGRAPHIC STUDY TO WORK OUT SITE POTENTIAL WITH MAXIMUM ADVANTAGE.

2) CREATING AXIS AND VIEWS ANGLES FOR NETWORKING THE SITE.

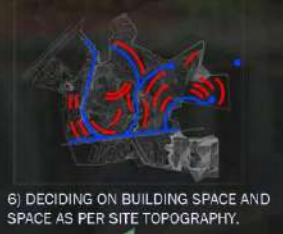

3) OVERLAPPING TOPOGRAPHIC AND AXIS STUDY AS PER SITE CONDITION.

4) ALTERATION AND MODIFICATION AS PER SITE FOR PROPER NETWORK THROUGH.

5) CREATING LAND PARCEL FOR DEVELOPMENT.

6) DECIDING ON BUILDING SPACE AND SPACE AS PER SITE TOPOGRAPHY.

7) FURTHER FINE TUNNING BUILDING SHAPES AND GREEN AREA FOR IDEAL PLANNING.

SKETCHES.

SKETCHES.

Plot area - 5 Acres  
Proposed total Construction area of the project 13,39,377.00 sq.ft.  
Construction done in 2015-2017 6,45,000 sq.ft. 31 storey residential building with 3 podiums

Tunnel Form Construction Technique was invented over 50 years ago. The use of tunnel-form produces high quality monolithic structures. It eliminates the use of any subsequent wet trades (Plastering etc). It is basically an operation to cast walls and slabs in one operation in a daily cycle. This technique is highly systematic, earthquake proven and provides an ideal solution to the critical problem of sound transmission. It gives a sound reduction of 50 dec.

## DSK Golf City, Area 256 Acres

Proposed Special Township project at Manjri, at Pune-Solapur road.

Architect Hafeez Contractor and the team has embarked upon the objective of creating a truly world class golf course community as a part of the part of the master planning process, for upcoming STP residential project, at Manjri, Pune.

The goal here is to bring in the concept of a premium golf living, thereby creating huge value addition and giving it a powerful direction in residential planning. This approach shall be unique to this region of Pune and its surroundings as there are no other such golf communities.

The planning has the potential of making this project the most sought-after and premium residential address. This will be a valuable addition to the DSK portfolio comprising of a variety of unique projects.

We truly believe that creating such a vibrant master planned golf community will not only catapult the region of Manjri and Pharsungi into a completely new territory but will also embark DSK into the high end luxury world as a Golf Community Developer.

### AREA CHART

PROPOSED SPECIAL TOWNSHIP AREA  
WITH GOLF COURSE = 236.19 ACRES

EWS Component = 05 BUILDING REQUIRED

a) EWS Component Area = 8,30,263 sq.ft.

FSI CONSUMPTION PER FLOOR = 5386 SQ FT.

FSI CONSUMPTION TYPE BUILDING (S+30) = 1,61,580 SQ FT.

(S+30) x 5 = 8,07,900 SQ FT.

PREMIUM APPT. CLUSTERS = 25 BUILDING REQUIRED

b) PREMIUM APPT. CLUSTERS AREA = 74,72,371 SQ.FT.

FSI CONSUMPTION PER FLOOR = 10909 SQ FT.

FSI CONSUMPTION TYPE BUILDING (S+30) = 3,27,270 SQ FT.

(S+30) x 25 = 81,81,750 SQ FT.

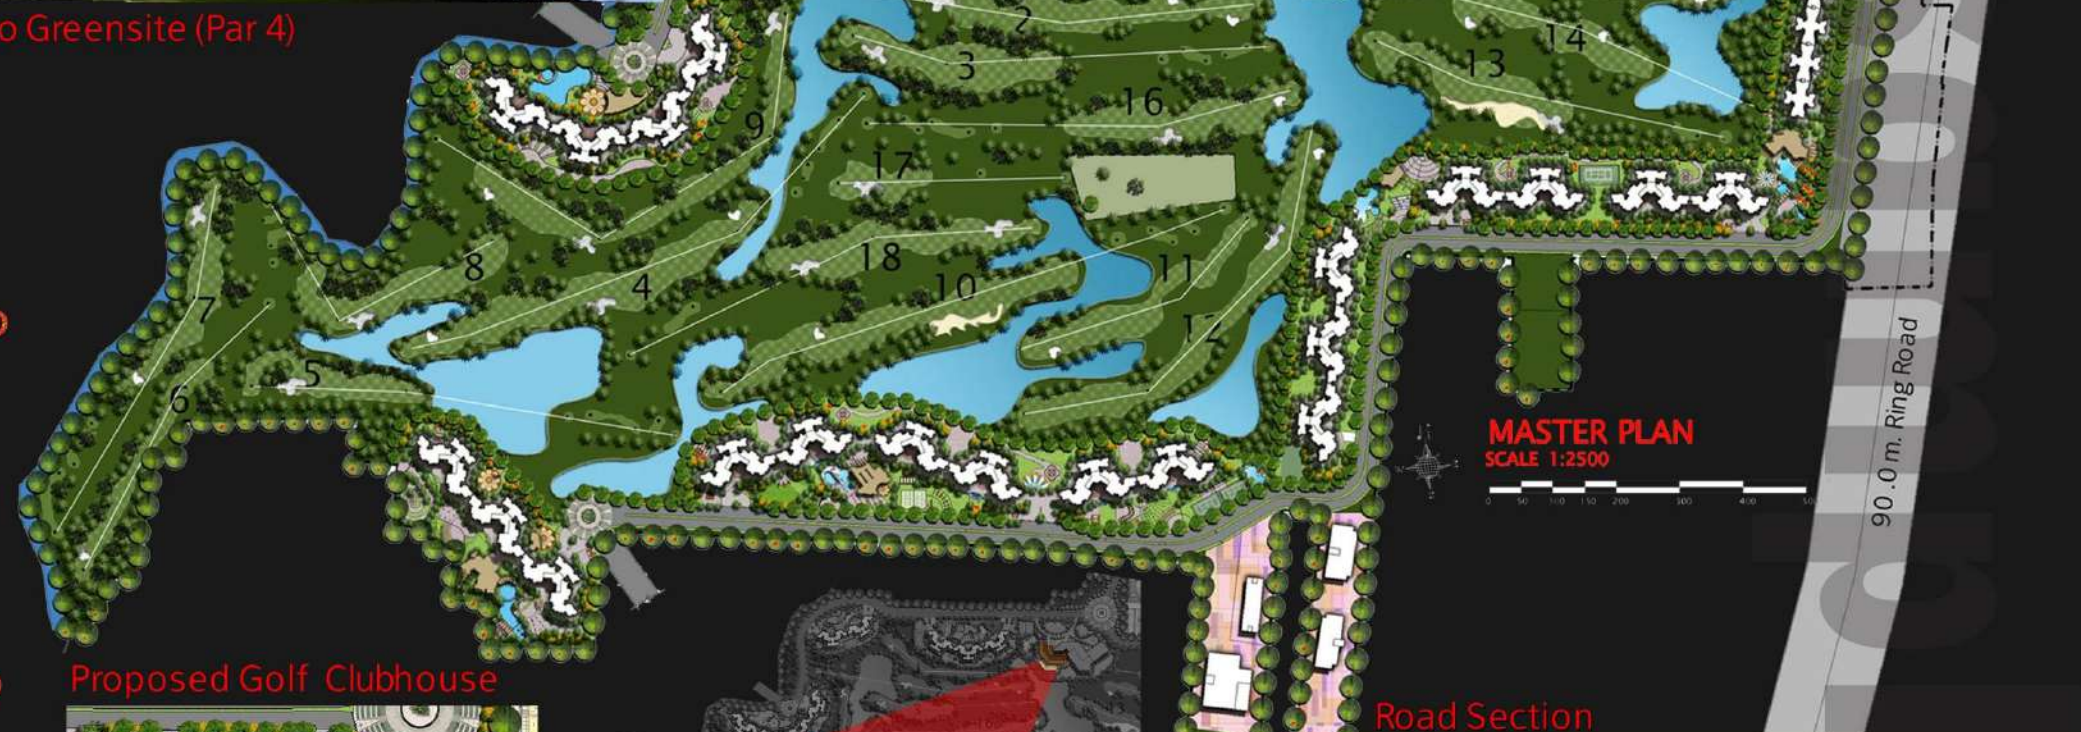

HENCE, TOTAL RESIDENTIAL FSI CONSUMED (a+b) = 89,89,650 SQ FT.
